

## ASSIGNMENT

Design a simple webpage named **My Pictures Gallery** (heading) using HTML, CSS and JavaScript. The following must be included as the content of the page:

- i) Top horizontal panel of webpage contains two categories of pictures: Movies (9 in number) and Favourite Personalities (15 in number). There will be button named **Random\_gen** inside each category which when pressed arranges the pictures randomly (use random function in JavaScript).
- ii) Right most vertical panel is labelled as Utilities. It contains two applications: Know your Zodiac Sign (user enters DOB and gets to know his zodiac symbol) and A BMI calculator (User enter Weight in kgs and Height in Feet & inches).
- iii) Bottom horizontal panel contains **Contact me** link which displays your name, registration number and Email ID.

**Submission date:** 11.04. 2020 (Saturday till **11 PM**)
